MODEL 02

ULTIMA CARGO - car carrier / container trailer

Two transport duties; operating modes are confirmed in the drawing.

Three-axle configuration shown. Container sizes and locks: per order.

Do not assume simultaneous mixed loading or universal compatibility.

WhatsApp +7 705 804 9278 | ultimatrailers.com | Revised 7 November 2026

MODEL 03

ULTIMA LOWBED - machinery transport

Multi-axle example. Payload, deck and ramps: per approved drawing.

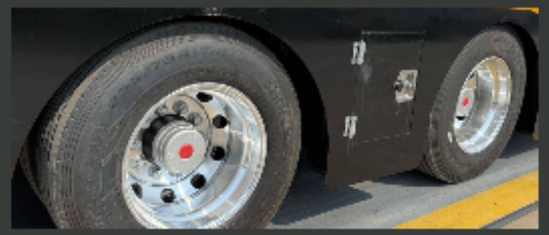

FACTORY & CAPACITY

Wholesale production partner

Production capacity and model range for GCC cooperation.

Up to 100 semi-trailers / month

Owner-reported total production capacity.

No reserved regional allocation.

MOQ: from 3 units, depending on configuration.

Typical production: around 3 weeks after technical and commercial approval.

Timing is confirmed for the order.

Freight and arrival time are separate.

TECHNICAL CAPABILITY 01

Manufacturing capabilities

Factory scale · steel processing · laser cutting · production line.

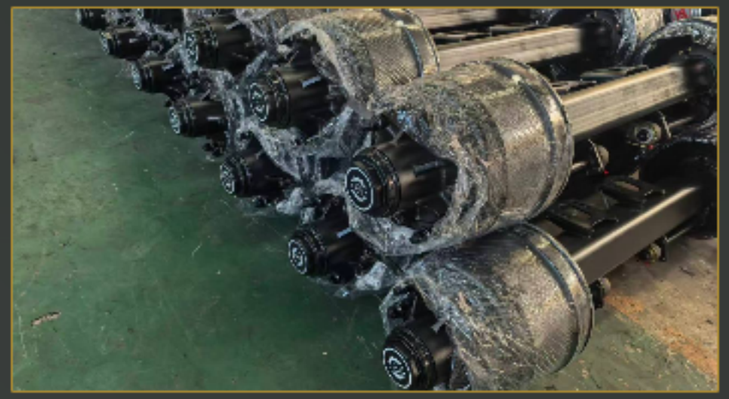

TECHNICAL CAPABILITY 02

Components & suspension systems

Configurable systems for payload, route and destination-market requirements.

Components defined in the order

Axle brand and rating, suspension, brakes and ABS/EBS: per specification.

Component photographs illustrate options; they do not establish the standard BOM.

Factory units: 12 months on main assemblies.

CKD/SKD: separate contractual responsibility.

COOPERATION

Simple start

Fast qualification before detailed quotation.

Factory contract and international sales coordination

1. Select PLUS, CARGO or LOWBED; state country and quantity.
2. Agree the drawing, component list, loading limits and inspection.
3. Confirm the factory contracting party, payment and delivery scope.
4. For service, send unit ID, photos and component details in WhatsApp.

Send the message yourself in WhatsApp; opening it is not an enquiry.
