ULTIMA PLUS

Double-deck car carrier semi-trailer for 8 or 10 vehicles

Capacity	**8 or 10 vehicles**
Length	**17–20 m**
Axles	**FUWA, SAF or BPW**
Deck lift	**Screw or hydraulic**
Loading decks	**Galvanized wheel recesses**
Pneumatic system	**Semi-automatic controls**
Tractor connection	**European-style connectors**
Corrosion protection	**Enhanced corrosion protection**
Braking system	**WABCO ABS or EBS**

Capacity depends on vehicle dimensions and the loading layout. Length and configuration are agreed when ordering.

Technical specifications

From 19 000 USD

ULTIMA CARGO

A dual-purpose semi-trailer for 8–10 vehicles or one 40-foot container.

Overall length	**16–20 m**
Axle count	**3–4**
Axle options	**FUWA, SAF or BPW**
Vehicle mode	**8–10 vehicles**
Container mode	**One 40-foot container**
Pneumatics	**Semi-automatic controls**
Loading deck	**Galvanized wheel recesses**
Structure	**Updated load-bearing components**

Vehicles and containers are carried in separate modes. Vehicle capacity depends on vehicle dimensions and the approved loading plan.

Technical specifications

From 22 000 USD

ULTIMA LOWBED

Lowbed semi-trailer for heavy equipment, with payload configurations from 50 to 90 tonnes.

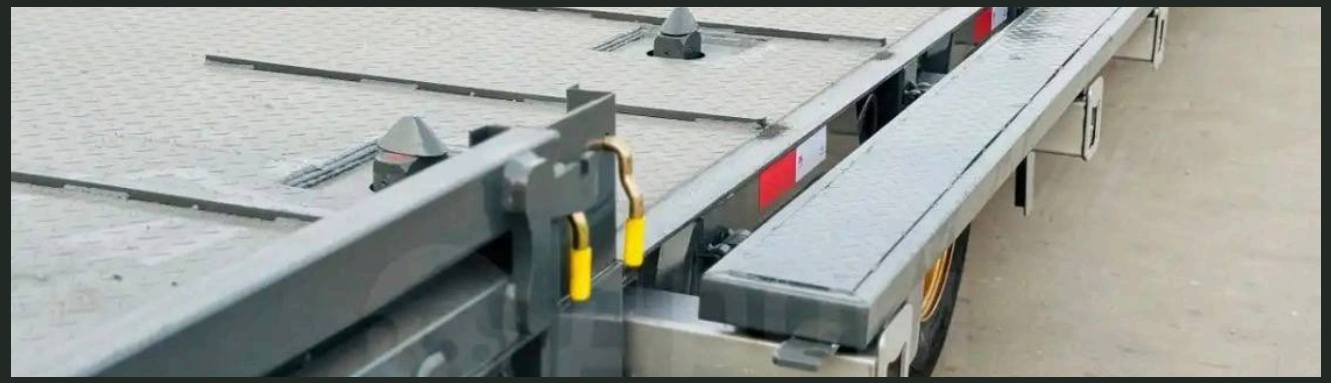

Length	**14–20 m**
Payload	**50–90 tonnes**
Axle count	**6–8**
Axle brands	**FUWA or BPW**
Suspension	**Air suspension**
Deck width	**Side extensions available**
Deck length	**Extendable deck available**
Loading ramps	**Mechanical or automatic**
Frame	**Steel up to 20 mm thick, depending on the component and build**

Length, payload and axle configuration depend on the build. The approved drawing specifies deck dimensions, axle loads and options.

Technical specifications

From 23 000 USD

Work with ULTIMA

Dealers and distributors

Fleet and dealer orders. Agree the model, batch, factory price and receiving point. Local stock, retail sales and finance are organised by the regional partner.

SKD/CKD and spare parts

SKD/CKD kits, axles, parts and steel frames can be discussed for selected models. Local assembly, private-label branding, drawings and responsibilities are agreed for the project. Container loading is checked for the actual configuration; Ro-Ro depends on carrier acceptance.

Shipping and service

Manufacturing

MOQ from 3 units, depending on model and configuration. Typical production is approximately 3 weeks after technical and commercial approval, subject to the agreed schedule; this is not delivery time. Inspection, handover point and freight are agreed separately.

Quality control

Length, payload and axle configuration depend on the build. The approved drawing specifies deck dimensions, axle loads and options.

Factory-completed units: 12 months on main assemblies under contract. Local SKD/CKD assembly has separate responsibilities. For service, send the trailer ID, component marking, photos and fault description. Local labour and parts shipping are agreed separately.
